

# RICHARD PRINS

## FULL STACK WEB DEVELOPER

### Summary

---

Full Stack Web Developer/Software Engineer with an insatiable willingness to learn, who genuinely enjoys creating things and expressing my creative side developing ways to improve a user's experience on the web, one application at a time.

### Employment

---

#### Pumpt, LLC Remote

##### Full Stack Developer May 2020 to Current

Full Stack Developer role for a lean startup in the Recruitment sector, I am tasked with developing and maintaining their codebase, adding new features, database maintenance/backups/migrations, and completing tasks to ensure users are given the support they need.

#### Lambda School Remote

##### Team Lead Aug. 2019 to May 2020

Internship position granted by Lambda School where Team Leads are tasked with engaging and leading a group of students varying in size from 6-10 in daily stand-ups, code review/assessment, taking attendance each day, acting as a resource to lean on when presented with a problem and helping to find the best path to a solution.

#### Stand and Stretch Remote

##### Web Developer/Web Management Personnel Apr. 2020 to Current

Freelance contractor position for a local web agency to complete various web management tasks, migrations and backups, also using my software engineering skills to assist with development of client e-commerce websites.

### Projects

---

#### Travel Guard - Crime tracker and statistics map for travelers Oct. 2019 to Nov. 2019

Crime statistics application built on a MERN stack to generate and render current up-to-date crime statistics in areas that users intend to travel to, with hot-maps and metrics pertaining to crime density per capita.

- Built out Authentication With AuthO and JWT.
- Used Mapboxes Geolocation API.
- Used Git & Github for version control on our app.
- Built out 100% of Application UI.
- Built a backend API using NodeJS, AWS, PostgreSQL
